## PRICE LIST—1928

WONDERFUL "GOLDEN PLUME"

---

# O. MACHHOLZ

---

NEW GREEN MARKET -:- 412-414 FIFTH STREET  
Between Poplar and Vliet Sts. -:- MILWAUKEE, WISCONSIN

D. N. Steiner

# Armour's Big Crop Fertilizers

## FERTILZERS ARE PLANT FOOD CARRIERS

**Nitrogen**, referred to as Ammonia, is directly associated with the formation of leaves and stems in plants, promoting a quick and vigorous growth which is accompanied by a deep, rich green color of foliage—a sign of health and activity.

**Phosphorus**, known as Acid Phosphate or Phosphoric Acid, hastens germination and favors rapid development of young seedlings, increasing the root growth, thus giving the young plant a good start. The formation of grain and fruit begins sooner when applications of soluble phosphorus are freely made. Phosphorus fills out the grain and fruit, increasing the proportion of grain to straw.

**Potassium**, commonly called potash, has a marked influence upon the development of leaves and stems. When potash is lacking, stems are apt to be weak and brittle. Potash enables the plant to produce sugar and starch, and helps to plump and fill the grain. It is also necessary in developing the fleshy parts of fruit.

# O. Machholz Wholesale List for 1928

All Previous Price Lists Are Hereby Cancelled

**PRICES SUBJECT TO CHANGE WITHOUT NOTICE**

I HAVE again the pleasure of presenting to you my catalogue for the coming season, and hope you will be induced by the extremely low prices to favor me with your orders which shall have my careful and prompt attention.

All my seeds have been selected with the utmost care and attention, therefore I am sure of their superior quality. No complaint can be entertained unless made on receipt of the goods and invoice, and no warranty or guaranty is given either as to description, quality, productiveness or any other matter of any seeds I send you, nor will I be responsible for the quality or value of the crops produced therefrom. Nevertheless I will certainly pay attention to any founded complaint, but a restitution of any article can never exceed the amount charged for in the invoice.

Being able and ready to meet all respectable competition, I would be glad to be informed if you are offered any article lower than these prices, and in such cases, I will, if possible, give you other quotations.

A new and adequate Parcels Post law now applies to shipments of seeds, bulbs, tools, plants and garden supplies to all of the United States; packages are subject to a limit of maximum weight in the first and second zones of 50 lbs.; and in all other zones, third to eighth, of 20 lbs. The maximum size of a package is 72 inches for combined length and largest girth. Insurance will be affected only when asked for and remitted for as follows: Parcels to the value of \$25.00 or under for 5 cents; to the value of \$25.00 to \$50.00 for 10 cents. Postage must be remitted in addition to the price of seed.

**ALL ACCOUNTS ARE DUE AND PAYABLE ON JUNE 1ST  
unless otherwise agreed upon.**

References as to quality of seeds sold by me; any of the leading market gardeners in the vicinity.

Respectfully,

O. MACHHOLZ.

**ALL LEADING VARIETIES OF FLOWER SEEDS**

**All Orders Promptly and Carefully Executed**

# NOVELTIES

What Their Growers Have To Say About Them.

## CUCUMBER

**"Longfellow"**

Fruit averages 12 to 14 inches in length by about 2½ inches diameter. One of the few cucumbers which when grown outdoors, resembles the hothouse type, holding its dark green color until the last.

## **"Monarch"**

This variety of pickel is early, uniform, and cylindrical. It eliminates the slight proposition in all pickling varieties, of the four cell or hollow cucumbers.

## PEA

**"President Wilson"**

This Pea is from 5 to 6 days later than Laxtonian, and has a vine from 18 to 20 inches, being quite stocky and a very deep green in color. Considered one of the handsomest peas.

## PEPPER

**California Wonder**

This new pepper is earlier than Chinese Giant, and nearly as large. It is square-ended; the walls are exceptionally thick, heavy and firm, and the flesh is sweet and spicy.

## TOMATO

**Canadian**

This variety is a cross between Bonny Best and Earliana, resembling the latter in growth. Has few seeds and is very solid. Exceptionally early and very hardy.

## SWEET CORN

**New Golden Sunshine (Prof. Yaeger's Type)**

This variety is from one week to ten days earlier than Golden Bantam. The plant growth is more dwarf, and the ears are closer to the ground. The ears are the same size as Bantam, but 12 rowed instead of 8, and of equally good color.
